

Reconciliation of GAAP and Non-GAAP Financial Measures Second Quarter Ended January 30, 2011

Campbell Soup Company uses certain non-GAAP financial measures as defined by the Securities and Exchange Commission in certain communications. These non-GAAP financial measures are measures of performance not defined by accounting principles generally accepted in the United States and should be considered in addition to, not in lieu of, GAAP reported measures.

Items Impacting Earnings

The company believes that financial information excluding certain transactions not considered to be part of the ongoing business improves the comparability of year-to-year results. Consequently, the company believes that investors may be able to better understand its earnings results if these transactions are excluded.

The following items impacted earnings in fiscal 2010:

- (1) In fiscal 2008, the company announced initiatives to improve operational efficiency and long-term profitability, including selling certain salty snack food brands and assets in Australia, closing certain production facilities in Australia and Canada, and streamlining the company's management structure. In fiscal 2010, the company recorded pre-tax restructuring charges of \$12 million (\$8 million after tax or \$0.02 per share) for pension benefit costs related to these initiatives.
- (2) In fiscal 2010, the company recorded deferred tax expense of \$10 million (\$0.03 per share) due to the enactment of U.S. health care legislation in March 2010. The law changed the tax treatment of subsidies to companies that provide prescription drug benefits to retirees. Accordingly, the company recorded the non-cash charge to reduce the value of the deferred tax asset associated with the subsidy.
